EDUCATION

G.L.A University

B.Tech in Computer Science and Engineering

Mathura, UttarPradesh

Aug. 2023 – Present

Morning Star Children's Academy

Senior Secondary School (12th)

Orai, UttarPradesh

2021 – 2022

TRAINING

Data Structures and Algorithms in JAVA

Jan 2025 – Present

G.L.A University

Mathura, UttarPradesh

- Developed strong problem-solving skills, applying programming methodologies to tackle diverse real-life challenges.
- Solved 190+ Leetcode problems (Easy, Medium, Hard), significantly honing algorithmic thinking and optimization techniques.
- Applied programming knowledge effectively to solve diverse questions in coding competitions

Web Development Intern

Jul. 2024 – Aug. 2024

CodeSoft

New Delhi, India

- Designed and styled visually appealing, responsive web pages using modern CSS3 techniques.
- Employed semantic HTML5 to build well-structured, accessible, and SEO-friendly website content.
- Engineered responsive, mobile-first layouts using media queries to ensure optimal functionality across all device viewports.

Machine Learning with Gen AI Intern

June 2025 – Present

G.L.A University

Mathura, UttarPradesh

- Performing data preprocessing and feature engineering on raw .csv files to build predictive models; gaining hands-on experience in training LLMs and applying NLP techniques.
- Working with multimodal AI, analyzing various generative models, and studying the core architecture of transformers and LLMs in Generative AI.

PROJECTS

Plant Disease Prediction Model | Python, NumPy, Pandas, Matplotlib, Seaborn, Git

Jun 2025 – July 2025

* Engineered a machine learning model to predict plant diseases by analyzing environmental factors (temperature, humidity, etc.) following rigorous data cleaning and preprocessing.

* Deployed a user-friendly mobile application providing real-time alerts for crop disease risk factors, achieving a 75 percent adoption rate among local farmers and enhancing regional agricultural resilience.

Customer Churn Prediction Model | Python, NumPy, Pandas, Seaborn, Matplotlib, Git

Jun 2025 – July 2025

- Built and optimized a customer churn prediction model by implementing a full data science pipeline, including preprocessing, hyperparameter tuning, and comparative model selection.
- Delivered a predictive tool to help telecommunication firms identify at-risk customers, enabling the deployment of proactive retention strategies.

TECHNICAL SKILLS

Languages: Java, Python, C, SQL, JavaScript, HTML/CSS

Frameworks: React, Node.js, WordPress

Developer Tools: Git, TravisCI, Google Cloud Platform, VS Code, Visual Studio, IntelliJ, Eclipse

Libraries: pandas, NumPy, Matplotlib, Seaborn

Core Concepts: Database Management System, Computer Networks, Object-Oriented Programming, Operating System

CERTIFICATIONS

Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate : 322469264OCI25AICFA

Introduction to Generative AI Studio: Certificate code : 8511328

Google AI Studio Masterclass - A Gen-AI Certification Course : Certificate No. :

5f931cfe-5cc6-4fd0-8cf4-08934-eb741be

Machine Learning with Gen AI: W3 grads
